Ask the River to Text You a WaterAlert

A new service from the U.S. Geological Survey called Water Alert, allows for instant updates about water conditions from their stream reporting stations. Whether you are watching for floods, interested in recreational activities or concerned about the quality of water in your well, WaterAlert allows you to receive daily or hourly updates about current conditions in rivers, lakes and groundwater when they match conditions of concern to you. National Weather Service in Lincoln and Ripton can be tracked on the web.

For more information go to:
